MATHMATICS RESOURCE GRANTS

Who

Infant, toddler, and preschool teachers in programs serving low-income families and public school teachers of grades TK – 3 in San Mateo and Santa Clara Counties. Limit of 3 grants per site for TK-3 schools, and all other sites will depend on classroom size; one grant per teacher each year.

What

Grants up to $500 are available to fund books, materials, software, manipulatives and professional development related to mathematics. We encourage requests which show curriculum resources are articulated between grade levels (ex. Preschool with Kindergarten,1st with 2nd grade, etc.).

How

Simply submit a description of your idea on school letterhead, including the following information:

• Date and notation on top that request is for a Mathematics Grant
• School and district name, address, telephone and fax numbers
• Your name, grade level and email address
• Description of your project
• Total amount requested
• Item by Item listing of how the money will be spent (we encourage same grade level teachers to apply together to maximize this resource grant)
• For TK-3rd grade teachers: Applications must be signed by both the submitting teacher and the school principal. For infant, toddler, and preschool teachers: applications must be signed by both the submitting teacher and the executive director of the program.

(If you cannot get your application physically signed, please cc your principal/director when submitting your request by email and let them know to respond by confirming that they approve your application for review. This email will serve as their "signature")

When

Send your request in as soon as it is ready. If approved, funds will immediately be disbursed. Please check our website at www.venturesfoundation.org before writing up a proposal to ensure funding is still available.

This program is made possible with funding from the
Heising Simons Foundation.
